

ETV Stakeholder forum

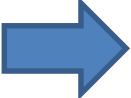

RESCOLL

28/01/2016

RESCOLL

-  **Rescoll is an SME providing tests, R&D and inspection services**

-  **Initiated ETV activity in 2012**

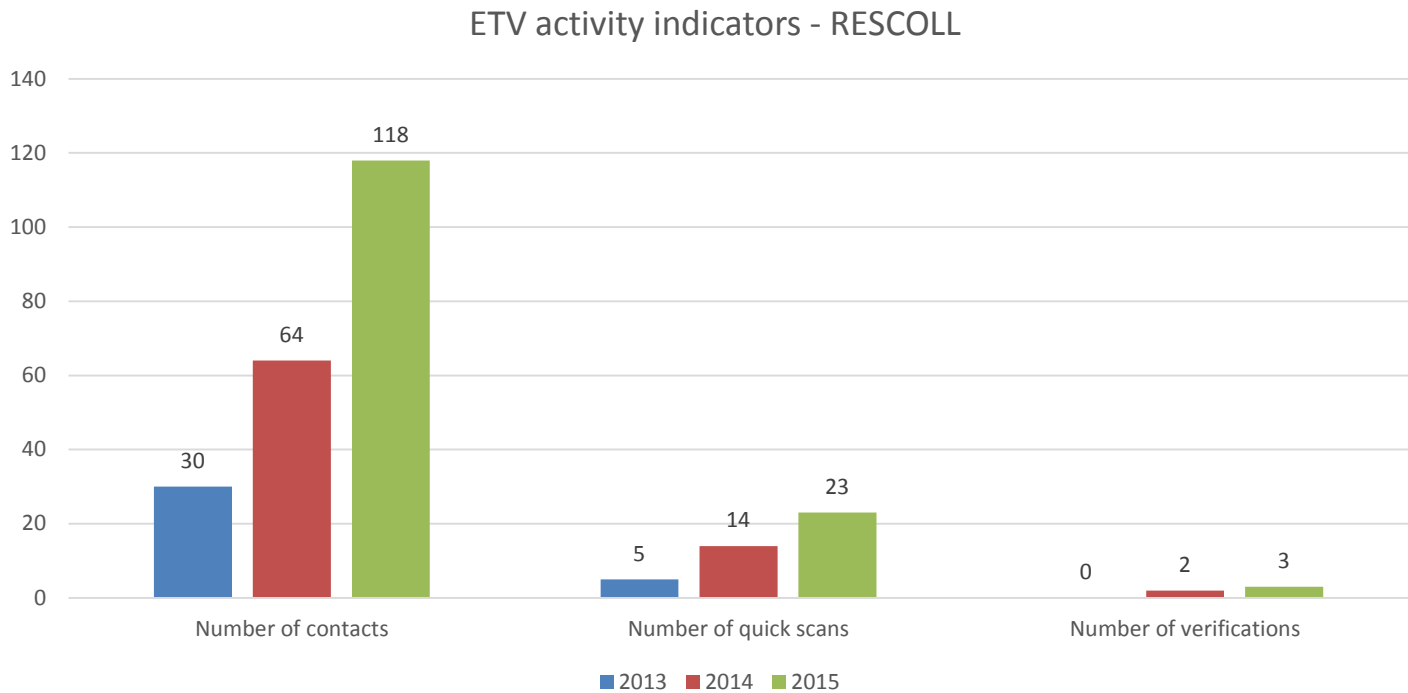

-  **Our scope :**
 - **Accredited for 3 european TA**
 - **Possibility to perform ETV for 4 other national technology areas**
 - **Soon, ISO 14034 ETV**

ETV = A GREAT POTENTIAL

ETV has a great potential :

- Can be the way for public or private buyers to know real performance of a technology
- Can be the way for SMEs to bring a proof of the reliability of their technology
- Can be a first step to make a standard
- Can be a great database of ecotechnologies
- Could tackle green washing

ETV activity in Rescoll

- Big dissemination work performed -> ETV is more known
- More and more activity
- 1 verification without public funding

ETV activity, some examples

- Manufacturer of biobased and biodegradable plastics
 - Give real percentage of biobased content
- Biogas plant
 - Tackle a regulatory blockage
- Wastewater treatment based on UV
 - Prove the performance of the technology

ETV activity in Rescoll

- 95% French companies
- 95% PME
- Some requests to perform coverifications with China or USA

Challenges

- **Need of dissemination**
- **Need to find « the pioneers »**
- **Need to build the network :**
 - **H2020 projects**
 - **Public procurement**
 - **Test bodies**
 - **Technical experts**
 - **Increase quality level of tests in R&D projects**

Keys of success

- **Implementation of a financial support for first companies going through ETV process**
 - French state
 - Danmark state
- **Promote ISO 17025 tests**
- **Simplification of the process**
 - Reach a goal of 15-20k€ for verification
- **Maintain reliability of the process**
- **International recognition**

Thank you for your attention
